

Test Point Nipple

Wade

Features & Benefits

- Range includes in-line tube to tube unions, tube to tube elbows and 1/8" BSP taper male nipples
- Designed to provide a pressure test point for LPG and natural gas systems
- Conform to BS 4161
- Compression ends are designed and manufactured to BS 2051
- Wade test point fittings are widely used on caravan and boat pipe installations where EU regulations stipulate the fitting of test points on gas system pipework
