

	<h1>listercut 150 Neat Cutting Oil</h1>
James Lister & Sons Ltd. Spon Lane South, Smethwick, West Midlands. B66 1QJ	

General

listercut 150 Neat Cutting Oil is a pale coloured low viscosity product made from best quality available solvent refined mineral oil. It is therefore safe and pleasant for the operator to work with.

The resulting blend is low in odour and low misting making it an ideal choice from an operator perspective.

Characteristics

The low viscosity listercut 150 Neat Cutting Oil facilitates a high flow rate and assists in the removal of fine swarf. It also makes the product extremely effective as a coolant of both workpiece and tool.

Appearance	Light yellow/amber liquid
Viscosity @ 40°C	22 cSt
S.G. @ 20°C	Around 0.890
Flash Point	> 200°C

Application

listercut 150 Neat Cutting Oil is suitable for machining operations on a wide variety of both ferrous and non-ferrous metals including stainless steel, free cutting steels and cuprous alloys. It is therefore particularly useful as universal cutting oil, thus allowing product rationalisation and eliminating oil change downtime.

Health and Safety

See separate MSDS sheet.
