<p>James Lister &amp; Sons Ltd. Spon Lane South, Smethwick, West Midlands. B66 1QJ</p>	

### General

listercut 400 GR Soluble Cutting Oil has been developed to provide a completely safe coolant which meets all European Health and safety requirements whilst providing the engineer with a long life, low foaming, high wheel flushing product. It is fully synthetic yet remains clear and clean in the presence of tramp oil and also avoids the problems of gummy deposits on wheels and components.

### Appearance

When mixed with water listercut 400 GR Soluble Cutting Oil forms an odourless fluorescent green transparent fluid which affords the operator an excellent view of the workpiece.

### Sump Life

listercut 400 GR Soluble Cutting Oil is highly resistant to bacterial and fungal degradation which results in exceptionally long sump life and reduced disposal costs.

### Dilution

For maximum life and no corrosion problems it is recommended that the product is used at a maximum of 30:1 .

### Materials

listercut 400 GR Soluble Cutting Oil may be used on a wide range of ferrous and non-ferrous materials including Cast Iron.

### Health & Safety

See separate CHIP sheet.
