<p>James Lister &amp; Sons Ltd. Spon Lane South, Smethwick, West Midlands. B66 1QJ</p>	

### General

listercut GP200 Soluble Cutting Oil is a general purpose water emulsifiable coolant which is free of nitrites, phenols and cresols. It is therefore extremely pleasant and safe for the operator to use.

### Application

listercut GP200 Soluble Cutting Oil is designed for use in general machining operations where a water based product is acceptable. It is suitable for free cutting ferrous metals, copper and aluminium.

### Emulsion Type

A very stable milky white emulsion is formed from adding the concentrate to water and stirring. Complete emulsification may be slow in some waters but this does not affect the final emulsion.

### Dilution

listercut GP200 Soluble Cutting Oil is recommended for use between 10:1 and 20:1 dilution in water at which it demonstrates excellent corrosion resistance.

### Bacterial Inhibition

The product is designed to give long sump life and is well protected against bacterial attack.

### Health and Safety

Hazard marking not required
